Protect your property with technology

Taking Domestic Control Panels to a new level.

With built in digital communicator and Grade 2 Wireless capability, the eurösec CPX is GardTec's latest release in Communication Control Panels.

Using the familiar wiring options on the control panel and external sounder, the installer can also complete the installation with wireless accessories using the RS485 bus for those difficult to reach locations, reducing installation time and meeting Grade 2 Wireless specification.

Applications

Domestic	The eurösec CPX gives the capability for the end user to receive notice of activations by the Vo-Comm speech dialler module, plus the capability to communicate through to a central monitoring station.
Commercial	The eurösec CPX offers 9 hard wired and 8 Wireless zones and 8 Wireless keyfobs, giving you cost effective opportunities.
Residential 1	Ideal for end users who request comms with Mobile phones using Vo-Comm speech dialler feature.
Residential 2	ARC police response market using digital communicator.
Residential 3	Combination of ARC Comms and confirmation of alarm through Vo-Comm speech dialler to home owner mobile.
