

Guardall Comms

Diverse Communication Platform

PSTN

- Can be fitted anywhere on the PX/QX bus
- Ademco Fast/Superfast/Contact ID/SIA level 3 and Home Beep formats supported
- Built-in modem providing up/download capability
- Supports audio/listen-in technology from Guardall
- Additional Speech module can be fitted
- DTMF output control (using speech PCB)

DUAL COMMS

- Ideal for higher security applications where an alternative signaling path must be provided
- Combines PSTN and GSM for all alarm reporting formats and up/downloading
- If either technology is sabotaged then an alternative path is used

GSM

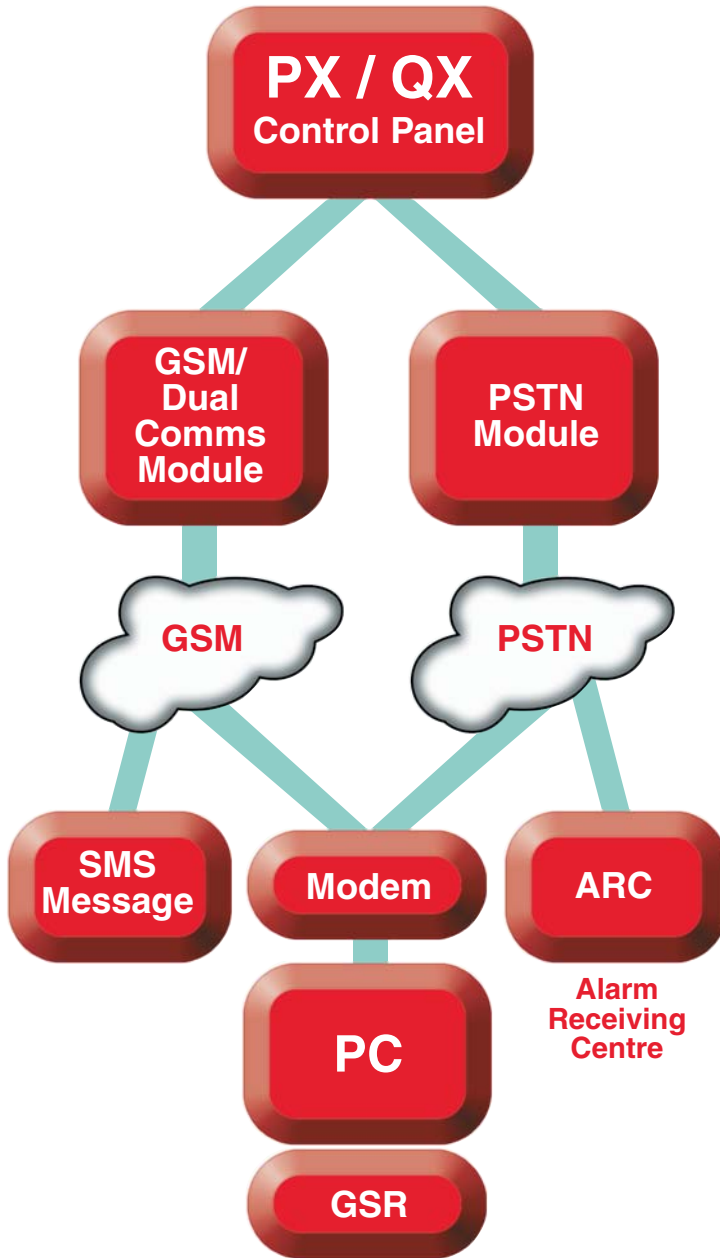

- Provides alarm reporting and up/downloading via GSM
- Can be connected onto the PX/QX bus providing easy installation and set up
- Cable sabotage becomes an issue of the past
- Can be used over any network of your choice
- Optional SMS messaging for alarms

Guardall

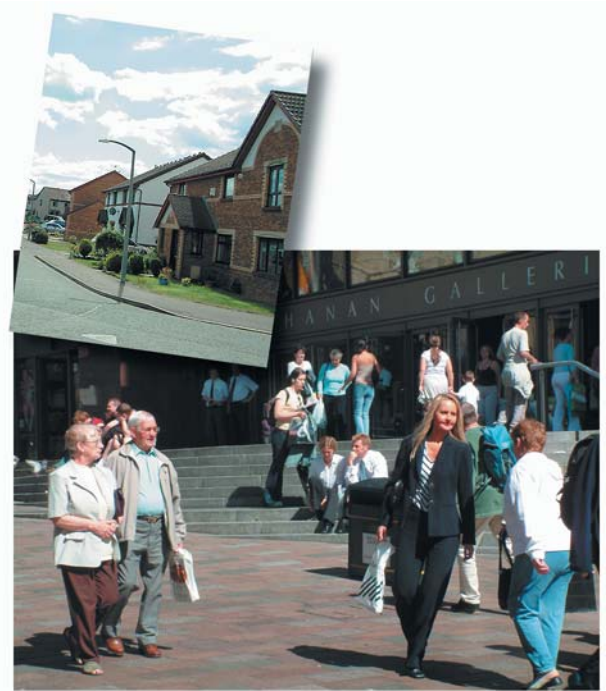

PX/QX Series

Diverse Communication Platform

Specification
