

Accessories

A full range of i-on 16 wireless accessories lets you and your installer design a security solution that perfectly matches your needs.

Additional remote keypads make it easy to set and unset i-on 16 around the smallest or largest home – while wireless smoke detectors make i-on 16 more than just an intruder alarm.

For ultimate peace of mind as you move around your home, you can carry a 2-button panic alarm (industry standard 868 Hz narrowband).

You can also select proximity tag setting for super-fast alarm setting and unsetting. Easy-to-use remote control lets you set and unset i-on 16 like you lock and unlock your car.

i-on 16 even allows alarm messages to be automatically sent to one or more pre-determined landlines or mobiles, or a commercial alarm receiving centre.

Whatever it takes to keep your home safe, i-on 16 has it covered.

Wireless home security system

Intruder radio technology just took a huge leap forward...

i-on 16 is manufactured and distributed by Cooper Security Ltd, one of the world's largest manufacturers of security equipment for all types of residential and commercial premises

Scantronic

Your peace of mind is everything

The Scantronic i-on 16 wireless home security system provides reassurance for people like you – people with lots to protect and busy lives to lead.

Whether you're home or away, i-on 16 fits into your life perfectly. With stylish looks combined with versatility and ease of use, providing uncompromised protection for your home.

Think i-on 16 for advanced wireless security from one of the world's largest and most experienced manufacturers of security systems for homes and families like yours.

Set the system with a press of the convenient keypad or swipe i-on 16's integral tag reader.

And relax.

i-on 16 from Scientific

Securing your lifestyle

Wherever you go or whatever you do, your home security must be reliable and easy to use. With i-on 16, proven wireless technology and stylish, practical design make it easy to protect everything you hold dear.

Protecting the people and things that mean most to you is easy with i-on 16's carefully considered functions and easy to use keypad. The extra convenience of quick-set comes as standard, all at the press of a button.

Then there's i-on 16's proximity tag reader for quick, convenient setting of your alarm with one swipe of your easy-to-carry tag. All the family can have one – it's perfect for busy people on the go.

Naturally, versatility comes as standard, with the features you need and the accessories to match how you use your home. The very latest in wireless technology is used for discreet efficiency and minimal disruption during installation...

As your pets sometimes stay behind, pet-tolerant PIR's allow them to enjoy their home while you're still on the road.

i-on 16 looks great too; small and stylish with its clear blue LCD display. See how unobtrusively it fits in – yet always easy to use, even as you hurry for a great night out...

The products and accessories your lifestyle demands

Everyone's home security needs differ. Have you got a young family or an elderly relative at home? Maybe some much-loved pets, or a hectic business travel schedule? Or perhaps you need to protect a detached outbuilding?

Whatever your lifestyle, and the people in it, we understand that you have unique home security challenges. Whatever your requirements, you can be sure i-on 16 gives you the benefits you expect whether you're home or away.

Stylish design that fits in anywhere

With its stylish keypad measuring only 115mm x 156mm x 34mm, i-on 16 will always fit in by your front door. For your reassurance, the keypad features easy-to-check status indicators, battery present testing, Power On and Alert/Fault indication. Everything you need to set, unset and monitor your alarm system is there – without unnecessary complexity.

16 zones and up to 16 different users

Because homes come in all shapes and sizes, i-on 16 will monitor and protect up to 16 independent radio zones around your property. Multi-zone protection gives you the flexibility you want today – with the expandability that makes it easy to extend your home or use it differently tomorrow.

You can also easily allocate up to 16 unique user codes – perfect for the family, cleaners or anyone else you trust with full or controlled access to your home. For peace of mind and so you know exactly who's been coming and going, i-on 16 logs up to 250 alarm events with event description, time and date details.

Partial or complete set – you choose

While you're away, i-on 16 protects your whole property, and when you return, imagine the convenience of easily choosing full or partial security to match how you use your home. How reassuring it is to secure downstairs while you sleep soundly. Or, with a press of a button, to secure your home's perimeter while everyone settles down for an evening together.

Quick installation and minimum disruption

The standard i-on 16 kit contains a stylish, easily mounted keypad and a control box that your professional installer can hide away discreetly. Both have been designed for quick installation as well as minimum disruption to your décor and your life – all detection devices are wireless. No carpets, floorboards or wallpaper needs to be lifted during installation.

i-on 16. Complete protection is easy, however you configure it.

The flexible approach to your security

Detection
