

# Silverline JPEG2000 Lite DVR

**LOW PRICE, HIGH FUNCTIONALITY  
AND AN 18 MONTH WARRANTY**

**Silverline**

Because Silverline makes sense...

The Silverline JPEG2000 Lite Digital Multiplex Recorder is now available in a full range of 4, 8 and 16 channels. The Lite range has most of the same great features you would find on the full function JPEG2000 Silverline DVR but is packaged in a slimmer case. The JPEG2000 Lite range features a reduced frame rate compared to its real time counterpart and therefore a reduced cost.

The 8 and 16 channel Silverline JPEG2000 Lite DVR units feature LAN network capability so that users can log in remotely to see what is happening at their premises. DDNS is also included eliminating the need for a router and static IP address. The 4 channel unit does not feature LAN networking at this time.

The unit still features a built in CD-Rewriter making backup of important events easier than ever. The simple backup procedure through the user-friendly menu system coupled with multi-level password login means that virtually anyone can perform a CD backup. The backup player software is provided with the DVR.

Built in PTZ protocols for Pelco enabled dome cameras negates the need for a separate PTZ keyboard. Simply wire the dome in through the RS-485 inputs on the back of the unit and set the dome ID and protocol up in the menu and control is yours.

## Extended 18 Month Warranty as Standard

We're so sure of the quality and reliability of the Silverline JPEG2000 Lite DVR that we have extended the usual 12 month warranty to an 18 month warranty on both the DVR and the hard drive.

The unit has proven itself through the sheer quantity sold in the past year and the exceedingly low number of genuine faults.
