STI EXTINGUISHER STOPPER

Stop theft, vandalism or misuse of fire extinguishers.

If you are fed up with replacing or recharging your fire extinguisher, this sturdy, tamper-proof, self-contained device is the answer. It has proven highly effective in helping stop theft, misuse or vandalism of fire extinguishers. The Extinguisher Stopper will leave the extinguisher totally accessible for emergencies and will not interfere in the event of a real fire.

HOW IT WORKS

Its highly visible 'stop sign' design discourages wrongful use. If the protected fire extinguisher is moved from its normal position, an integral sounder emits a piercing alarm. The device is easy to install and a deactivation cable is supplied for ease of servicing the extinguisher. The Extinguisher Stopper is supplied complete with an operating cable kit and a 9V PP3 alkaline battery.

HAS THE EXTINGUISHER STOPPER PREVENTED THEFT?

We have been very satisfied with STI's products in particular the Extinguisher Stopper, which has reduced the loss of equipment to a satisfying zero on our site at The Luton and Dunstable Hospital. By nature the equipment is sited adjacent to doorways and regrettably some of our visitors felt that it was free and available to them to take the extinguishers away. Having fitted the Extinguisher Stoppers we no longer have equipment being stolen over holidays, weekends and nights. Anybody wanting to protect extinguishers will certainly find value for money by using the Extinguisher Stopper.
