Flex Technology Proximity Cards & Tags

- Use one proximity card or tag for cross compatibility with multiple brands of intruder alarm or access control systems.
- Available as an ISO Printable Proximity Card, low cost Clam Shell Proximity Card and a choice of Proximity Tags.
- Constructed using high quality processes and materials with ink-jet serial numbering (except ET1-U).
- Compliant with CE, ROHS and WEEE Directives.
- 5 Year Warranty

Our Flex Technology Proximity Cards & Tags are of a very high quality construction using only the best materials, coils and chips. The Flex Technology range includes an ISO thickness card for direct image print, a clam shell style card offering unparalleled value for money and a key ring style tag with sprung steel rings. All products come with a 5 year guarantee.

Ordering Information:

Flex Clam Proximity Card – EC1
Flex ISO Printable Proximity Card – EC2
Flex Tag 32mm Proximity Tag – ET1
Flex Tag ECO 32mm Unnumbered Tag – ET1/U
Flex Tag Mini 25mm Proximity Tag – ET2

Our Flex Technology Proximity Cards & Tags are built on T5X 125KHZ write once technology that allows us to be compatible with multiple brands of intruder alarm, access control, audio & video door entry and gate automation systems. Our special in-house encoding format allows common inventory across many brands with a single proximity card or tag.
