

Advanced Security for your environment

COOPER Safety

i-on160EX security system

Suitable for commercial properties with up to 160 detection devices

Compliant as an insurance specified system up to Grade 3 with police response to alarm activations

Easy to understand instruction messages guide the user

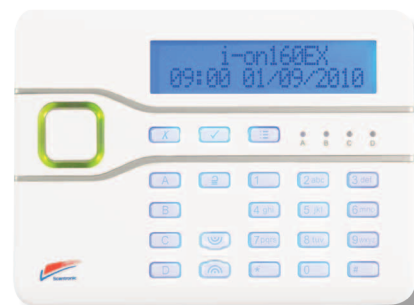

Configurable to as many as 20 separate alarm systems. Each with independent setting/unsetting

A wide range of user types gives far more control over the way people interact with the system from full administration rights to a simple set only (e.g cleaners)

Up to 500 users can be set up with a code, prox tag, remote control and radio panic button to control one or more of the 20 separate alarm areas

Provides Facilities Managers or Site Security with greater control over the system via a PC or smart-phone

Multiple keypads can be installed on the system giving enhanced flexibility

The products and accessories your commercial needs demand

The i-on160EX from Scantronic has been designed with the commercial user in mind. With 160 detection zones the system is ideal for flexible modern commercial spaces. The system can be configured to behave as 20 unique alarm systems each able to be set and unset independently providing unparalleled flexibility.

The i-on160EX can accommodate up to 500 users, each can use a code, prox tag, remote control and radio panic button. The system keypads provide clear and concise instruction and guidance to ensure that the alarm is simple and easy to use for multiple users.

Wired Keypad

		Description
Detectors	PIR	Installed wirelessly in the corner of a room to detect movement
	Door Contact	Alerts the alarm panel when the door is opened. Available in white or brown
	Smoke Detector	Wirelessly linked to the alarm panel. Optical smoke detection
	Shock Sensor	Senses vibration from someone entering by force. Fitted to a door or window. Ideal for large windows. Available in white or brown
	Glass Break Detector	Detects the sound of breaking glass
	PA Button	Can be a pendant or belt clip. This goes into alarm when the two buttons are pressed together, ideal for security guards
Controls	Wired Keypad	Stylish and easy to use keypad with simple menus
	Wireless Keypad	Fit a second keypad by the back door or on the landing for setting and unsetting
	Remote Control	Set and unset the system quickly and easily from inside or outside the property
	4 Relay Board	Enables you to add additional bells and sounders for notification
Alerts	External Sounder	Local audible and visual warning devise
	Dummy Sounder	Effective deterrent for the back of your property
	Plug-in SD/comms modules	Would be used to generate a police response
	ADSL Filter	If you are using the comms module with broadband, this is essential for your phone line
