- ▶▶ automated household management

Visonic[®]

For a smart and secure lifestyle

A woman with blonde hair, wearing a black long-sleeved top and black shorts, is performing a handstand on a light-colored wooden floor. Her arms are extended upwards, and her legs are also extended upwards, forming a 'Y' shape. The background is a bright, blurred interior space with large windows and a blue and white geometric pattern at the bottom of the frame.

Home Security... and a Whole Lot More

These days it seems like we're always on the run - to work, to school, to shops, to friends. Sure, life in the fast lane is fun, but sometimes we pay a price: the more frantic the pace, the more we feel out of control.

We want to make sure that when you're on the run, you're still under control. That's why we've introduced the PowerMax+ Home Security and Management System - a wireless system offering not only the very best in home security, but also a bit of extra help around the house. With PowerMax+ Webcam connectivity, you can remotely 'look in on your home' anytime, from any computer, anywhere. But that's not all.

Whether at home or on the go, you can automate a full range of everyday household tasks that saves you plenty of time - something we can always use more of.

So join the hundreds of thousands of satisfied customers of PowerMax+ products and relax, because all at home is under control.

Advanced Household Management You Can Afford

Home safety alerting – immediate notification in the event of burglary, smoke, flood, gas leak or personal emergency

User friendly – real-voice prompts and easy-to-read LCD display in the language of your choice

Arrival notification – automatic notification when children arrive home and disarm system

Message center – remote or local recording of voice messages, with message notification after individual arrives home and disarms system

Two-way voice communication – initiation of two-way conversation with individuals at home with the press of a button

Real-time remote viewing – Webcam connectivity that enables view of home interior/exterior at anytime, from any computer, anywhere

Household task control – remote and automated management of household lighting, electronic shades, gates, heating/cooling systems, irrigation systems and electrical appliances

Energy management tool – pre-scheduled or real-time remote control of home lighting for energy cost reduction

Easy accessibility – accessible via a secure Internet, mobile or landline phone connection

Wireless Security You Can Count On

With so many advanced capabilities, it's easy to forget that PowerMax+ is first and foremost a world-leading, easy-to-use wireless home security system. In just two hours, PowerMax+ can be installed throughout most homes, causing no damage to walls and décor. PowerMax+ is equipped with rechargeable batteries that maintain system operation in the event of electrical failure.

PowerMax+ also offers an array of over 25 optional wireless sensors that provides a wide range of further functionality. For example, the system delivers additional levels of home security through glassbreak and motion detectors, home safety through smoke, gas and flood detectors, and personal emergency assistance. PowerMax+ ensures maximum protection for both you and your home.

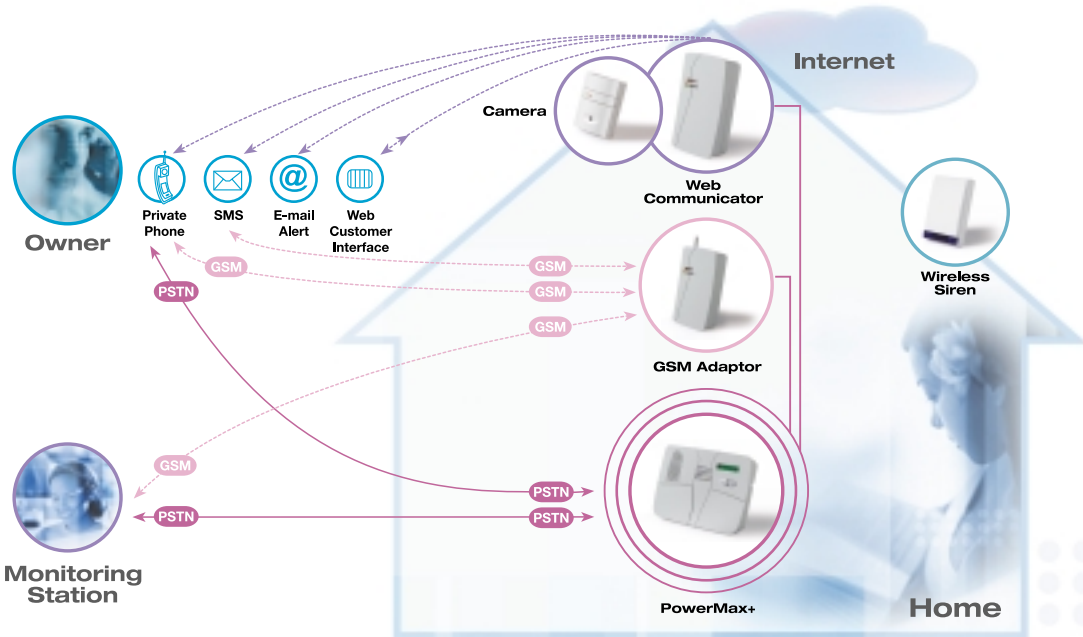

Pet tolerance – intelligent detectors accurately detect a human while ignoring animals (up to 38 kg, or 85 lb.), enabling pets to roam free at home

High-level detection accuracy – patented true-motion-recognition technology provides the industry's best detection reliability and sensitivity

Advanced jamming detection – guarantees immediate reporting of system jamming

Mobile support – mobile (GSM) backup in case of landline failure or system sabotage, as well as a preferred solution for properties without a landline connection

PowerMax+™ - Under Control at Home and Away

Terms & Conditions

PowerMax+ requires an active telephone line (the system is compatible with most forms of residential telephony connection, except ISDN2e). PowerMax+ requires 240V mains power for the control panel. Call and connection charges from the control panel in your home to any third-party service via your telephone line are not included, but will be billed separately by your telephone service provider. Additional accessories sold separately.

Pet tolerance provided by PowerMax+ movement detector may vary. Wireless performance may vary, and is subject to local conditions and topography. Full Terms and Conditions available on request.

Visonic reserves the right to change specification without notice. Information correct at time of going to press. All rights reserved. Visonic is a registered trademark of Visonic Ltd. PowerMax+ is a registered trademark of Visonic.
