

# Columbus Pneumatic Timer

Time range 10 sec - 10 min

## 400 Series Push Button Timer

### INTERIOR

400 Series

### DAMP AREAS

163

**Please note!** Timer unit is not supplied with Part No. 163 (Splash Proof Shroud and Gasket Kit only)

See page 30 for wiring diagrams

### Key Features

- No Neutral Required
- For Fluorescent & Incandescent Lighting
- Adjustable Timing Range between 10 seconds and 10 minutes
- Compatible with 20mm deep single gang BS accessory plate
- Can replace existing single gang wall switches
- Approved to BS EN 60730-2-7

The Columbus 400 Series offer a variety of options for either installation or replacement of existing single gang switches for use on incandescent, fluorescent or compact fluorescent lighting applications. Pushing the button switches the contacts, and activates the time delay. The unit has Normally Open and Normally Closed contacts as standard.

The unit is supplied with M3.5 fixing screws and blanking plugs to cover the screw heads as standard.

The 'A' suffix is for use on flush mounted applications. The 'B' suffix is supplied with an 18mm deep patress for surface mount applications.

The 400 Series can be made splash proof by the fitting of a rubber shroud and gasket kit - Elkay Part No. 163. When fitted, the switch can be suitable for damp areas.

Part No.	Description	Options	Load Rating at 240Vac			Time Range	Requires Neutral?
			Incandescent	Fluorescent	Compact Fluorescent
