

MTECC Flex Proximity Cards & Tags

- Use one proximity card or tag for cross compatibility with multiple brands of intruder alarm and access control systems (e- range).
- Available as an ISO Printable Proximity Card, low cost Clam Shell Proximity Card and a choice of Proximity Tags.
- Constructed using high quality materials with no markings, ink-jet numbering or removable validation label.
- Compliant with CE, ROHS and WEEE European Directives.
- Special low cost application tags for Castle Care-Tech and Texecom intruder alarm panels.

Our Flex Technology Proximity Cards & Tags are of a very high quality construction using only the best materials, coils and chips. The Flex Technology range includes an ISO thickness card for direct image print, a clam shell style card offering unparalleled value for money and a key ring style tag with sprung steel rings. All products come with a 5 year guarantee.

Our Flex Technology Proximity Cards & Tags are built on T5X 125KHZ write once technology that allows us to be compatible with multiple brands of intruder alarm, access control, audio & video door entry and gate automation systems. We have lower cost tags for both the Castle Care-Tech Euro (CC1) and Texecom Premier (TX1) Panels but these are specific for these applications.
