ievo® Micro™ Reader

PAC introduces ievo® into our access control portfolio for internal use.

ievo® has been designed, after many years of research, by a team of professionals who have been at the sharp end of biometric deployment, installation and integration. This wealth of knowledge has been obtained not only from industry experiences with the shortfalls of existing technologies, but also obtaining feedback from installers and end users.

Biometrics have proven time and time again to overcome all of the security issues that card and fob systems have. The cost of biometric systems, however, coupled with reliability issues have curtailed profits and industry growth. ievo® eradicates all of these existing issues and offers a quick, simple and cost effective solution.

The newest offering - ievo Micro™ - has been integrated with PAC SecureNet to provide a method of enrolling finger templates into the access database. ievo® offers PAC the opportunity to provide a reliable and superior biometric product to all of its new and existing clients.

ievo® has combined many unique features offering a large number of outcomes and benefits. ievo Micro™ uses multispectral imaging combined with a superior award winning algorithm offering a system that will work in harsh environments and with problem fingerprints.

FEATURES:

- Identification < 1 second
- Multispectral imaging sensor
- Spoof detection
- Great ergonomics for easy use
- User friendly
- Long Life piezo button
- LED accepted/denied indication built into button
- Audio beep indication
- Internal use only
- Unobtrusive design
- Integrates into existing SecureNet systems*
- Easy to install 'plug and play system'
- Easy to use interface

to find out how you can start benefiting from a tailored PAC security system that accommodates your business' requirements.

"We have used PAC for many years on a variety of different projects. These have ranged from large scale, city-wide access control for councils, to high-security and high-profile buildings. Not forgetting smaller installations such as schools and offices. The product range can cater for all the different needs. We value PAC highly, it ticks all the boxes, is great to use and the customer/ technical services are superb."
