

Premier 48 DualCom Inside®

Commercial grade control panel with dual path signalling

*Keypad available separately

Reliable monitored dual path signalling is now easier than ever.

Quality security systems deserve reliable alarm communications. Introducing the Premier 48 DualCom Inside®, containing Texecom's widely acclaimed Premier 48 control panel and dual path signalling devices, ready for connection to the CSL DualCom Gemini Managed Network.

Prepackaged. Preconfigured.

The Premier 48 DualCom Inside® contains all the hardware required for dual path signalling. The kit includes a wireless GPRS/GSM communicator and DualCom-ready Vodaphone SIM card, backed up by a 2400-baud modem. The Premier 48 DualCom Inside® contains software that automatically configures the system for connection to CSL's Gemini network, making the installation process simple, straightforward and rapid.

Gemini Managed Network

Behind DualCom is a powerful network of polling servers that are duplicated over five geographical sites to ensure robust delivery of alarm communications. The Gemini network is the power behind all DualCom devices and currently handles over 450 million calls per month. With fixed links and radio links into all UK Alarm Receiving Centres, the Gemini network has an exceptionally resilient network with 99.99% accuracy.

Features include:

- Monitored communications
- Dual path signalling
- GradeShift® technology
- NGN/21CN Compliant
- GSM Call back up

Dual Path Signalling in 3 Easy Steps!

Step 1 – Purchase Premier 48 DualCom Inside kit

Step 2 – Order monitoring package from ARC (Alarm Receiving Centre)

Step 3 – Commission alarm system
