USB DATA PROTECTION DOWNLOAD KITS

HAY-MUSBKT32GB - MASTER PACK FOR SITE

This kit provides the user with 25 incident report logs for CCTV evidence. The 32GB MASTER drive is to be kept on site and used for the users own backup of any incident until the authorities have finished with the evidence. If anything happens to the original evidence given to the authorities you have a backup as the DVR/NVR will usually have written over the evidence. After any case is finished then the incident on the Master drive must be deleted. 2 X Data Protection compliant CCTV A4 warning signs where you write the operators name & contact details with the permanent marker provided. This pack is designed to be used with HAY-5USB16GBPK which are the drives and evidence bags for incident downloads to be used by the authorities.

(Contents)
1 X Digital incident logbook – which includes
25 triplicate incident reports
10 Subject access request forms
