RF-PA

Wireless Panic Alert Device

A hold-up device for end users to trigger a siren, alert a monitoring station and/or contact key-holders in the event of attack or concern for their personal safety.

The dual-push design is such that accidental activation is greatly reduced.

The RF-PA is also aesthetically appealing and is suitable for most architectural situations.

- SecureWave 2-way wireless technology
- Dual-push panic buttons
- Latching and momentary actions
- BS 8243:2010 (confirmed hold-up)
